

# CASE STUDY

Here's how PeoplActive helped an **Australian healthcare giant** build cyber resilience with its exceptional tech-talent

# Overview

An Australian healthcare giant and an ASX listed company was seeking for cybersecurity with extensive experience and skills all while adhering to industry standard compliances.

About the

# Brand

Our customer is a **leading infection prevention company** head-quartered in Sydney, Australia which is setting quality standards globally with its innovative commercialized technology solutions focused on preventing the transmission of life-altering infections.

# A Call for Change

The infection prevention company was seeking someone with extensive experience in Cybersecurity

to help them efficiently identify and mitigate the unique cybersecurity risks and vulnerabilities applicable to their organization, validate the existing IT procedures, develop new procedures and auditing policies (IT and Information Security), achieve ISO certification, assess their performance against federally recognized security practices, and meet HIPAA/GDPR compliance requirements.

# The Challenges

Australian Infection Prevention and ASX-listed companies sought cybersecurity consulting services to fortify their virtual fortress against cyber threats.

- They needed a thorough review of **HIPPA/GDPR policies**
- In need of validating **IT procedures** to ensure they align with HIPAA/GDPR requirements.
- Need to develop new procedures to address **identified gaps**.
- Need guidance to determine the necessary security practices for **risk assessment**.
- Assist with **cyber security assessment**, including auditing policy and remediation.
- Support in creating **ISO roadmap and certification documentation** with ISMS governance.
- Aid team members in **ISO certification** and addressing Corl gap remediation.

# **From insights to action, delivering value that makes an impact**

The leading healthcare brand was seeking a company with extensive experience in Cybersecurity to help them. We have now taken up the responsibility of identifying control gaps, and shifting the perspective of what is truly necessary to protect an organization of this size.

# PeoplActive's Cybersecurity Consulting

is now creating remarkable & tangible value for the **medical infection prevention company**

by helping them mitigate cybersecurity risks, validate the existing IT procedures, develop new procedures and auditing policies (IT and Information security), and achieve ISO certification. They are really amazed by the accountability and the skills these experts bring to the table. The client has requested to extend the work engagement for further tenure.

# Way Forward

Looking ahead, while the industry's reputation for stringent regulatory compliance will always present new and interesting challenges, PeoplActive's quest for delivering immediate solutions with exceptional cybersecurity consulting and advisory, is what brings peace of mind to the leading Australian infection prevention company.
